## Company Service

# M3Net Service

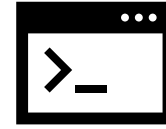

## Hub Connectivity

In the modern business and information technology environment, hub connectivity services are crucial for enabling efficient communication, collaboration, and access to central resources. These services help facilitate the rapid and integrated exchange of information across the organization or network.

## FTTX (FTTB & FTTH)

FTTx (Fiber to the X): This term refers to various implementations of fiber optic networks that deliver broadband connections to different points, such as homes (FTTH), businesses (FTTB), or buildings (FTTB). The 'X' in FTTx can refer to a home (FTTH), business building (FTTB), curb (FTTC), or other various implementations.

## Managed Service & SI

This includes proactive monitoring and management of IT infrastructure, including networks, servers, data storage systems, and other hardware. The service provider ensures the availability, performance, and security of the systems.
